Quality

We strongly follow the AQL for every single garment. Our inspectors check every single garment before it pass on to the next stage.

All garments are stitched only by the approved factories of international standard, confirming to social accountability norms.

Vision & Mission

Our Vision

We aspire to establish ourselves as a premier worldwide producer of premium knitted clothing, simultaneously promoting local community development through employment opportunities and environmentally responsible manufacturing methods.

Our Mission

At CS Garments, our mission is to serve as a reliable manufacturing collaborator for both Indian and international fashion brands, specializing in knitted apparel. We are dedicated to delivering exceptional products through innovation, punctual deliveries, and sustainable production methods. Our aim is to make a positive contribution to our local communities by empowering rural women through job creation and skill development initiatives.

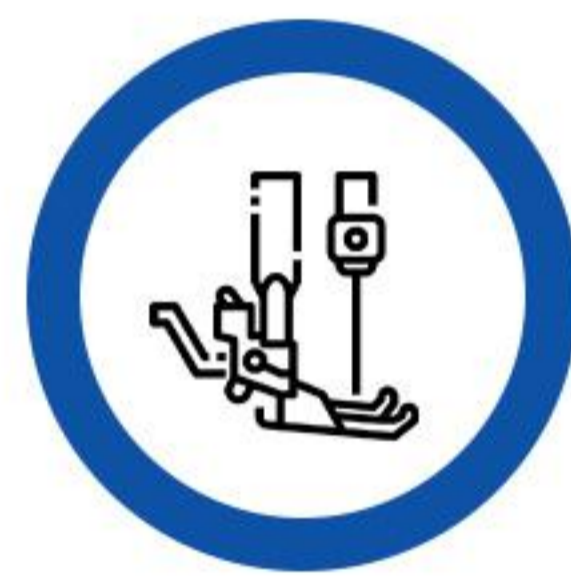

Our Infrastructure

Design & Sampling

We have a state of the art design studio equipped with.,

- 1) Virtual Fit Simulation
- 2) Graphic Design and Forecasting

Spinning

Our Spinning facility houses modern machines from LMW, India & Schlafhorst, Germany. We also produce blended and organic yarn to cater to our socially responsible clientele. We also Produce Compact yarn, Slub yarn, Fair Trade, BCI, Organic Cotton, and ETI.

Knitting

Our knitting plants, with Circular & Flat Knitting machines imported from Europe and Asia, knit a variety of fabrics – Jersey, Rib, Interlock, Pique, Feeder & Auto Stripes, Jacquards, with Lycra, flat knit collars, waffle, Fleece in all gauge and feeders.

Dyeing & Finishing

To process cotton, Polyester and blended fabrics, we have the advanced HTHP cheese dyeing division. Equipped with machinery from Thies, Germany, Brozoli Italy. Our OEKO-TEX and GOTS certified fabric dyeing division has a modern Effluent Treatment Plant & Reverse Osmosis Technology, and Biological treatment technologies and Nano Technology reinforcing our commitment to eco-friendly practices. (Zero Liquid Discharge)

Printing

Printing is one of our chief strengths. Equipped with two rotary printing machines, we produce innovative and trendy designs in pigment, reactive, and discharge up to 10 colors with engineered repeat options.

All Over Rotary Printing capacity – 12 Tonnes/day.

Accessories

Our elastic division manufactures both knitted and woven elastic by using Comez (Italy) and Jacob Muller (Switzerland) machines. We have the facility of printing barcodes, price tickets, carton stickers and labels, and packaging materials. We have in house EDI (Electronic Data Interchange) facility also.

Embroidery

Our embroidery divisions have sophisticated Japanese and German machines using CAD/CAM designing, which enable mass scale execution of intricate embroidery in up to 9 colors with, Laser cut & Sequence, with the latest technology.

Laboratory

Right through our production processes, we have rigorous testing of physical and chemical parameters to ensure zero defects. The balanced combination of supervisory personnel and sophisticated machines in laboratories could provide competent test results. The laboratory management system is accredited as per IEC/ISO 17025 and is approved by various brands. The laboratories have wider test capability to handle specific confirmation, performance/durability, and safety tests including analysis of various organic toxins including azo dyes, phthalate content, chlorophenols, chlorobenzenes/toluene, etc.

Production Facilities

Our production facilities are state-of-the-art factories equipped with the latest in technology used in garment manufacturing right from Gerber cutting to packing comprising Japanese, European & American machinery. A strong Infrastructure enables us to meet the customers' requirements even before the proposed deadline.
